

SUPERBILLS FORM

Saving Grace is happy to supply you a superbill, a detailed invoice that provides a comprehensive breakdown of services provided, along with associated costs. Superbills are typically used for healthcare services that may be reimbursed by insurance companies.

The information on a superbill includes details your insurance company will need for reimbursement, such as the date of service, the healthcare provider's information, the patient's details, a list of services provided (including medical codes), the cost of each service, and any applicable diagnostic codes. Superbills serves as a record of the patient's visit and the services rendered, facilitating the reimbursement process with insurance providers.

Find a link to your insurance provider to file for reimbursement:
